*"The product we have sold is well built..
I have no call backs on the units that
we have in the field at Ft. Indiantown
Gap Army Depot and the catalog is an
easy read to find the product"*

- Dave Roberts, Maryland Pipe & Supply

BEECO-2019-07

BEECO AUTOMATIC CONTROL VALVES

BEECO Automatic Control Valves are used in a variety of Commercial Plumbing, Industrial and Institutional control applications. They are actuated by various hydraulic and/or electric pilot controls, and utilize line pressure to perform a wide range of On-Off, Regulating, and Combination control functions.

- PRESSURE REDUCING
- SOLENOID (On-Off) CONTROL
- LIQUID LEVEL CONTROL
- FLOW CONTROL
- PRESSURE RELIEF, SUSTAINING, & BACKPRESSURE CONTROL
- ELECTRONIC REGULATING CONTROL (SCADA Control)
- PUMP AND WELL CONTROL
- SYSTEM SAFETY & PROTECTION CONTROL

BEECO Automatic Control Valves are constructed of ductile iron and are 100% coated with an extremely durable, high-quality electrostatic fusion bonded epoxy coating as standard. They are available in 1-1/2" through 24" Full Port (-HF) and 2" through 32" Reduced Port designs, with FNPT Threaded (-IPS), ANSI Class 150 or 300 Flanged (-HP) end connections. Every BEECO Automatic Control Valve is hydrostatically tested to ensure peak performance and boast standard features not found in other Automatic Control Valves such as:

- DUCTILE IRON BODY & COVER
- STAINLESS STEEL MAIN VALVE INTERNALS*
- **316 STAINLESS STEEL MAIN VALVE TRIM**
- "NEAR-ZERO" LOW FLOW PERFORMANCE
- FUSION BONDED EPOXY COATED 100% INSIDE AND OUTSIDE
- STAINLESS STEEL BODY & COVER PORT SLEEVES
- STAINLESS STEEL FASTENERS*
- EPDM RUBBER COMPONENTS
- ISO STANDARD LENGTHS AND DIMENSIONS
- CERTIFIED LEAD FREE

* 6" AND SMALLER

BEECO also offers Automatic Control Valves in complete 316 Stainless Steel for the ultimate in performance and corrosion resistance. Consult your BEECO representative for more details.

ACV4.00-HF-EOSSV (SHOWN WITH STANDARD TUBING & FITTINGS)

FOR SPEC. SHEETS GO TO www.beecobackflow.com

WORKING PRESSURE: 250 psi
BODY & COVER: Epoxy Coated Ductile Iron
ELASTOMERS: EPDM
TUBING / FITTINGS: Reinforced Nylon w/ Brass Fittings
CONTROL PILOT(S): Bronze / Brass

Optional at extra charge (consult BEECO):

- Copper Tubing & Brass Fittings
- Stainless Steel Tubing & Fittings

ACV4.00-PR (SHOWN WITH OPTIONAL STAINLESS STEEL PILOT CONTROL SYSTEM)

FOR SPEC. SHEETS GO TO www.beecobackflow.com

BEECO -PR Series Pressure Reducing Valves are designed to reduce a fluctuating high upstream pressure to an adjustable constant lower downstream pressure regardless of varying flow demand.

BEECO -PS Series Pressure Sustaining Valves are designed to maintain an adjustable minimum upstream pressure, and are normally installed between two pressure zones (Pressure Sustaining Control) or on the discharge side of a pump (Backpressure Control).

WORKING PRESSURE: 250 psi
BODY & COVER: Epoxy Coated Ductile Iron
ELASTOMERS: EPDM
TUBING / FITTINGS: Reinforced Nylon w/ Brass Fittings
CONTROL PILOT(S): Bronze / Brass

Optional at extra charge (consult BEECO):

- Copper Tubing & Brass Fittings
- Stainless Steel Tubing & Fittings
- Complete Stainless Steel Control System

"Another manufacturer dropped the ball and I was able to get a Beeco ACV PRV quickly. The customer was skeptical because it looked different due to not having a bypass. The rep assured him it was not needed with a Beeco ACV and walked him through the installation"

- Brian Churilla, National Plumbing & Heating

Distributed by: MIFAB®

ACV4.00-HF-FLDI1 (SHOWN WITH OPTIONAL STAINLESS STEEL PILOT CONTROL SYSTEM)

FOR SPEC. SHEETS GO TO www.beecobackflow.com

BEECO -FLDI1 Series On-Off Differential Level Control Valves are designed to control the liquid level in a storage tank or reservoir. It has separate adjustable Opening (Low Level) and Closing (High Level) set-points allowing for optimum water turn-over to avoid stagnation.

- WORKING PRESSURE:** 250 psi
- BODY & COVER:** Epoxy Coated Ductile Iron
- ELASTOMERS:** EPDM
- TUBING / FITTINGS:** Reinforced Nylon w/ Brass Fittings
- CONTROL PILOT(S):** Bronze / Brass Standard w/ (2) 24" Float Rods
- Optional at extra charge (consult BEECO):**
 - Copper Tubing & Brass Fittings
 - Stainless Steel Tubing & Fittings
 - Complete Stainless Steel Control System

BEECO -FLEL Series Electric On/Off Level Control Valves open or close fully when the Solenoid is energized by the Electric Float Switch (included). Solenoid enclosure is standard NEMA 4 110-120 VAC.

FOR SPEC. SHEETS GO TO www.beecobackflow.com

"The Beeco ACV's are the easiest and most reliable control valve we have ever installed. We have been using nothing else for several years and have never had an issue"

- Jeff Yosko, MTM Mechanical

ACV4.00-HF-LFB-PR-BA	4"	1	160	\$10,605

BEECO -PR-BA Series The bypass regulator, typically set 5-10 psi higher than the main valve pilot, controls the pressure under low flow conditions while the main valve remains closed. When the flow capacity of the regulator is exceeded, the pressure drops to the set point of the main valve pilot, causing the main valve to open and provide the higher flow. Response of the main valve is adjusted by an opening speed control.

WATER QUALITY

BEECO -SSP Series Pressure Reducing Valves are designed to reduce a fluctuating high upstream pressure to an adjustable constant lower downstream pressure regardless of varying flow demand.

- WORKING PRESSURE:** 250 psi
- BODY & COVER:** Epoxy Coated Ductile Iron
- ELASTOMERS:** EPDM
- TUBING/FITTINGS:** Reinforced Nylon w/ Brass Fittings
- CONTROL PILOT(S):** Bronze / Brass
- Optional at extra charge (consult BEECO):**
 - Copper Tubing & Brass Fittings
 - Stainless Steel Tubing & Fittings
 - Complete Stainless Steel Control System

REDUCED PORT PRESSURE SUSTAINING

NSF APPROVED STAINLESS STEEL PILOTS

FLANGED BY FLANGED (ANSI 150)

WATER QUALITY

BEECO -SSP Series Pressure Sustaining Valves are designed to maintain an adjustable minimum upstream pressure, and are normally installed between two pressure zones (Pressure Sustaining Control) or on the discharge side of a pump (Backpressure Control).

"After installing an ACV the customer called me and said "It was the best ACV PRV that he had ever installed and only wanted Beeco in the Future"

- National Plumbing & Heating Brian, Churilla

ACV4.00-HF5PR (SHOWN WITH STANDARD PILOT CONTROL SYSTEM)

 FOR SPEC. SHEETS GO TO www.beecobackflow.com

BEECO -PR Series Pressure Reducing Valves are designed to reduce a fluctuating high upstream pressure to an adjustable constant lower downstream pressure regardless of varying flow demand.

WORKING PRESSURE: 250 psi
BODY & COVER: Epoxy Coated Ductile Iron
ELASTOMERS: EPDM
TUBING/FITTINGS: Reinforced Nylon w/Brass Fittings
CONTROL PILOT(S): Bronze / Brass

ACV4.00-HF5PS (SHOWN WITH STANDARD PILOT CONTROL SYSTEM)

“MIFAB has shown to be the low cost producer in our market. They have done it with improved technology and ease of product components. We have grown our business from \$0 to over \$150,000.00 in less than 3 years.”

- Don Patry, The Tap of Kansas

Model AV-MH-K

Air & Vacuum Valve

Model AV-MH-KA

Combination Air Release and Air & Vacuum Valve

Model AV-MH-KA-SA

Combination Air Release and Air & Vacuum Valve with Surge Arresting Feature

BEECO Air Release Valves are constructed of ductile iron and are 100% coated with an extremely durable high quality electrostatic fusion bonded polymer coating as standard. They are available in 2” through 10” Full Port (-MH) and 3” through 12” Reduced Port (-MS) designs, with both ANSI Class 150 and 300 Flanged (-HP) end connections.

Installed at pipeline high points, functions include Air Release (-A), Air & Vacuum (-K) and Combination Air Release and Air & Vacuum (-KA). An innovative adjustable surge arresting feature (-SA) is available for -KA Models.

BEECO also offers a line of corrosion resistant Plastic Air Release (AV-P-A), Air & Vacuum (AV-P-K) and Combination Air Release and Air & Vacuum (AV-P-KA) Valves in sizes 1/2” through 2” MNPT.

PURPOSE:

VENTING AIR FROM A FILLING PIPELINE

The standard valve allows the discharge of large volumes of air while the system is being filled with liquid, preventing water hammer. The valve remains open, even at very high air flow velocity (Fig. A), until the liquid reaches the float lifting it to the closed position (Fig. B).

VACUUM BREAKING (AIR INTAKE) OF A DRAINING PIPELINE

A decrease in system pressure to a negative value and the simultaneous drainage of the valve chamber causes the float to drop, allowing the admittance of air into the pipeline preventing negative pressure from causing potential pipeline collapse (Fig. C).

This function is available in Models with suffix -K and -KA.

RELEASE OF DISSOLVED AIR FROM A PRESSURIZED PIPELINE

Air that is released from liquid in a pressurized system, or is introduced into the system from open sources and/or pumping vortexes, reduces system efficiency and causes water hammer. Air Release Valves installed at system high points allow air to accumulate in the valve chamber.

The accumulated air forces the liquid out of the valve chamber, reducing the upward force on the Bottom Float. As the Bottom Float drops, trapped air is vented through the small Nozzle in the center of the Top Float. As the liquid returns into the valve chamber the Bottom Float is lifted, sealing the Nozzle (Fig. D).

This function is available in Models with suffix -A and -KA only.

ADJUSTABLE SURGE ARRESTING FEATURE

BEECO MH and MS Series Combination Air Release and Air & Vacuum Valves (-KA) can be fitted with a unique, adjustable, surge arresting feature (-SA). As air is exhausted from the pipeline, the optional (-SA) surge arresting feature limits the air outflow when the velocity exceeds the adjustable limit. This feature creates a temporary slow closing “air cushion”, controlling potentially damaging water hammer in the pipeline.

AV4.00-MH-K (ILLUSTRATED)

Designed especially designed for Wastewater Systems, BEECO Models AV-WP-KA-SS and AV-WP-KA-CS Combination Air Release and Air & Vacuum Valves allow the discharge of large volumes of air while the pipeline is being filled preventing water hammer, and the admittance of air, preventing damaging negative pressure, when the system is drained. The valves also vent trapped air and gases that accumulate while the pipeline is pressurized.

The specially designed conical inlet reduces fluid velocity, also preventing water hammer. The extended body design lowers the Float, allowing the valve to efficiently operate while keeping fluid and suspended solids from fouling sealing mechanisms and avoiding atmospheric spillage. Valves are equipped with a side-mounted 1" NPT Stainless Steel Isolation Ball Valve for draining and flushing operations.

PURPOSE:

The BEECO FDC is designed to eliminate contamination from cross connections in a potable water system. A cross connection is any physical connection between two separate systems, one of which contains drinking water and the other polluted or contaminated fluids, chemicals or sewage. Contaminated water may flow through cross connections and between connected systems as the direction of flow can reverse depending on the pressure differential of each system. The BEECO Double Check Valve is designed to protect against both backpressure and back-siphonage.

SIZING AND INSTALLATION GUIDE:

The BEECO Double Check Valve is made to fit all standard pipe sizes from a 1/2" supply line up to a 10" main supply line. These valves can be installed in either indoor or outdoor applications but need to be protected against freezing in cold weather climates. All backflow devices must be installed by a licensed plumbing professional and must be installed to your local and state plumbing codes. All Double Check valves must be retested each year by a trained licensed backflow specialist.

HOW IT WORKS:

A simple method of protecting your potable water supply without the need to re-establish pressure by means of pumps or towers, is the use of a double check valve. The BEECO Double Check Valve comes with two internal checks. These checks are spring loaded and open and allow water to pass through the direction of flow when the water pressure reaches 4 PSI or higher, and the checks stay open as long as there is flow and pressure in the normal direction of flow. Should a backpressure or back-siphonage occur in the system causing reverse direction in water flow both check valves will close, preventing contamination of your water supply.

FEATURES AND BENEFITS:

The new modern redesigned BEECO Friendly Double Check Valve was designed with input from hundreds of plumbers, and many backflow specialists were involved. It was designed with ease of access and a dramatic reduction in the spare parts needed. The light weight short lay length modular design makes this valve the easiest and quickest valve to perform your mandatory yearly certification on. For a complete list of all our features and benefits, see our website: www.beecobackflow.com. The BEECO Double Check Valve is available with a detector check bypass and flow meter used on fire lines. See the DCDA product offering.

BEECO Double Check Backflow Prevention Devices are designed to protect against contamination of potable water. Installation and selection of the proper device should be made by a qualified licensed professional.

FDC3.00-NRS-G-BA (ILLUSTRATED)

FOR SPEC. SHEETS GO TO

WWW.BEECOBACKFLOW.COM

SPECIFICATION: The BEECO Friendly Double Check Backflow Preventer Valve is designed to stop the reverse of flow of a liquid into a potable water system. The proper installation of a backflow preventer must be done by a certified expert under local codes and guidelines to assure the protection of the drinking water system. The valve is certified to ASSE 1015, CSA B64.5 and listed with IAPMO.

FUNCTION: The assembly shall consist of two repairable positive seating check modules with captured springs and rubber seat discs. Service of all internal components shall be through a single easily removable cover and designed for ease of access.

"Beeco is a worry free alternative for all my backflow needs"

- John Marotta, Ridge Plumbing

APPROVALS:

Tested and certified to A.S.S.E. Standard 1015, AWWA Compliant C510 (with gates only), CSA B64.5 and listed with IAPMO. Valves are tested and listed to UL

BEECO Double Detector Check Assemblies prevent the backflow of contaminated materials back into the potable water supply. The DCDA valve incorporates a meter to detect and measure ground leaks and illegal taps, reducing water expenses.

Its modern, light-weight design is made of ductile iron and fused bonded epoxy coating. The shutoff devices are AWWA 509 compliant.

BEECO REDUCED PRESSURE ZONE BACKFLOW PREVENTERS

“MIFAB has always been a very high quality product that has been backed by high quality Customer Service.”
 - Plumbing Wholesaler, Phoenix, Arizona

PURPOSE:

The BEECO FRP or Reduced Pressure Zone device is designed to eliminate contamination from cross connections in a potable water system. A cross connection is any physical connection between two separate systems, one of which contains drinking water and the other polluted or contaminated fluids chemicals or sewage. Contaminated water may flow through cross connections and between connected systems as the direction of flow can reverse depending on the pressure differential of each system. The BEECO Friendly Reduced Pressure Zone Device is designed for maximum protection in high-hazard applications

SIZING AND INSTALLATION GUIDE:

The BEECO Reduced Pressure Zone Device is made to fit all standard pipe sizes from a ½" supply line up to a 10" main supply line. These valves can be installed in either indoor or outdoor applications but need to be protected against freezing in cold weather climates. All backflow devices must be installed by a licensed plumbing professional and must be installed to your local and state plumbing codes. All Reduced Pressure Zone Devices must be retested each year by a trained licensed backflow specialist.

HOW IT WORKS:

A method to provide maximum protection to your drinking water is the BEECO Friendly Reduced Pressure Backflow Device. It protects your potable water supply without the need to re-establish pressure by means of pumps or towers, and it comes with both two internal checks and a relief valve that will dump all fluids. The checks are spring loaded with the first check being stronger than the second check, allowing the relief valve to dump contaminated fluid. Should a backpressure or back-siphonage occur in the system and start the flow of water in a reverse direction, and the second check fails for any reason, the relief valve will open while the first check continues to protect your water supply. To protect against indoor water damage refer to the BEECO ACV-HF-EOSSV Electric Override Safety Shutoff Valve.

FEATURES AND BENEFITS:

The new redesigned BEECO Reduced Pressure Zone Device was designed with input from hundreds of plumbers, and many backflow specialists were involved. It was designed with ease of access and a dramatic reduction in the number of spare parts needed. The light weight short lay length modular design makes this valve the easiest and quickest valve to perform your mandatory yearly certification on. For a complete list of all our features and benefits, see our website: www.beecobackflow.com. The BEECO Pressure Reduced Zone Device comes with a Detector Check By-pass and flow meter used on fire lines. See the RPDA product offering.

FOR SPEC. SHEETS GO TO www.beecobackflow.com

SPECIFICATION: The BEECO Friendly Reduced Pressure Zone Backflow Preventer is designed to stop the reverse of flow of a liquid into a potable water system. The proper installation of a backflow preventer must be done by a certified expert under local codes and guidelines to assure the protection of the drinking water system. The Valve is certified to ASSE 1013, CSA B64.4 and listed with IAPMO.

FUNCTION: The assembly shall consist of two repairable positive seating check modules with captured springs and rubber seat discs. Service of all internal check components shall be through a single screwed in cover and designed for ease of access. The valve shall be equipped with a serviceable and replaceable relief valve with easy access repair and replacement while in line.

FEATURES: The checks are designed with a unique thumb screw holding in the disc to allow for easy removal of the check with a simple pair of pliers dramatically reducing part breakage during repair. The single threaded cover makes for the quickest access inside the valve in the industry. Repair parts are so modular it only takes two relief valve kits and three check repair kits to cover all sizes 1/2" through 2".

FOR SPEC. SHEETS GO TO www.beecobackflow.com

All BEECO FRP valves 2 1/2" thru 4" can be installed in the vertical position.

RATINGS:

Maximum working water pressure 175 PSI, Maximum working temperature 140° F, Hydrostatic test pressure 350 PSI, Flanged end connection meet ANSI B16.1 and all grooved dimensions comply with AWWA C606.

Complies with AWWA-C511. All RP devices must be install where a drain is available to cover the discharge in the event there is a backflow condition and the relief valve discharges.

DISCHARGE RATES ARE AS FOLLOWS:

1/2" to 1" 5 GPM,
1 1/4" to 2" 20 GPM,
2 1/2" to 6" 20 GPM, and
8" to 10" 60 GPM.

2 1/2" thru 8"

Function: The BEECO® Series Barracuda 40 REDUCED PRESSURE VALVE Backflow Prevention Valve prevents non-health hazard pollutants and hazardous contaminants from entering a potable water supply system when backpressure and/or backsiphonage conditions occur. This product is designed for the waterwork, plumbing, and irrigation markets only.

Sizes: 2 1/2", 3", 4", 6"(x), 8"

Working Pressure:
10-175psi (0.7-12.1 bar)

Temperature Range:
33°-140°F (1°-60°C)

Flanged Ends:
ANSI B16.1 Class 125

Lead Free: Patents:
0.25% Maximum by Weight

"As someone representing their products, MIFAB makes me feel like they are in the trenches with me. They are a partner who understands and supports us."

- Tom Babcock of Kast Marketing, Chicago, IL

Maximum working water pressure 150 PSI.
 Maximum working water temperature 140° F.
 Hydrostatic test pressure 300 PSI.

MATERIALS: Main valve body Cast Bronze
 ASTM B584, Fasteners Stainless Steel, 300 Series.

Elastomers Silicone (FDA approved) , Buna Nitrile (FDA approved), Polymers Polypropylene (FDA approved).

Delrin® (FDA approved), Springs Stainless Steel, 300 series.

“Plumbers like Beeco products It’s comparable with the competitors product and a great product well-made works well”

- Terry Zhang,
L.C. Plumbing & Electrical Supply

TK SERIES

BACKFLOW PREVENTER TEST KITS

Model Number	Size	Qty. per Carton	Weight per Carton (Lbs.)	List Price (Each)
TK5-BACKFLOW-TEST	ALL	1	10	\$ 2,500

SPECIFICATION: Gauge

TYPE: Diaphragm Differential Pressure,

DIFFERENTIAL PRESSURE ACCURACY: ±0.2 P.S.I.D. (Descending),

WORKING PRESSURE: 200 P.S.I.G.

FUNCTION: The BEECO Test Kit is a compact portable device made for testing, reduced pressure zone assemblies, and double check valve assemblies, pressure vacuum breakers, and anti-spill vacuum breakers.

TEMPERATURE LIMITATIONS: Maximum 150°F/65°C.

FREEZING TEMPERATURES MUST BE AVOIDED!

"Thanks to your catalogue, we find it easy to navigate the pages and place an order. The detailed information shown there helps us to match the size of the unit for replacement of existing grease traps. The plastic grease trap distribution program is very user friendly and has helped to increase our sales dramatically."

- Bill Cornwell,
Manager, Bucks Wholesale Supply, Tampa, FL

RATINGS: 2 1/2" - 4" 750 P.S.I., 5" - 6" 700 P.S.I. 8" 600 P.S.I., 10" 500 P.S.I., 12" 400 P.S.I. Reducing Couplings 300 P.S.I.

GASKET:

MATERIAL: EPDM Temperature Rating: -30°C to +110°C; -20°F to +230°F. Applications: Water, diluted acids, oil free air, waste, high temperature vapors, etc.

DESIGN: "C" Type Gasket standard design, provides a pressure responsive, leak-tight seal in both pressure and vacuum applications without the aid of external forces.

Ductile cast iron conforming to ASTM A536, Grade 65-45-12 equal to QT 450-12. Surface Finish: Standard dip painted.

Optional fused bonded epoxy coated in various colors. Vacuum applications without the aid of external forces.

"The unique riser systems on the MIFAB plastic interceptor line makes our installations quick and easy."

- Larry Medlen, Project Manager, Rock City Mechanical, Nashville, TN

Under CV add maximum working pressure 400 psi (27.6 bars); temperature rating -20° to 100° F (-29° C to 38° C). Maximum temperature rating is 400° F.

Under ASVB add maximum temperature 180°F (82°C); maximum working pressure 125 psi (8.6 bar).

BEECO's Anti-Siphon Vacuum Breaker is designed to meet the requirements of ASSE Standard 1001, CSA B64 and ANSI A112.1.1. Device must be installed 6" above the highest point of the downstream piping. There can be no shutoff devices downstream of the ASVB.

"The convenience of a local stocking warehouse is a great incentive to sell"

- Tim Galbally, Pennypack Plumbing Supply

The BEECO Full Port Ball Valve is a two piece Bronze Ball Valve with a chrome plated ball. The valve has a blow out proof stem with adjustable packing. Its full port design eliminates the significant pressure losses caused by standard reduced port valves.

The BEECO Full Port Ball Valve is used in commercial and industrial applications on a wide variety of liquids and gases.

Each valve is 100 percent factory tested; standard options are locking handle, Stainless Steel Handle and stainless steel handle nut. Blow out proof pressure retaining stem, adjustable stem packing, heavy duty handle with slip resistant vinyl insulator.

600 WOG and 150 SWP. Conforms to Federal Specification WW-V-35, Type II class A, Style 3 & MSS SP-110. Temperature Range 0° F to 450° F.

BEECO Pressure Gauges are designed for use in residential, commercial, industrial and HVAC applications.

Accuracy to ASME type B with a copper alloy NPT connection in various sizes and ratings. These are used for all suitable air and liquid systems for medium which does not clog connection ports or corrode copper alloy. Can be used in all water applications and can be used in both pneumatic systems and compressed air systems.

The BEECO® Series GV-FXF-OSY is a Flanged by Flanged OS&Y (Outside Screw and Yoke) Resilient Seated Gate Valve. It is manufactured in compliance with AWWA C515 Standard. Flanges are to ANSI B16.1, Class 125 drilling pattern. The body, bonnet, and wedge (disc) are of high strength ductile-iron, ASTM A536, Grade 65-45-12. The wedge is encapsulated with EPDM rubber. The stem and bolts are of stainless steel.

Function: Used in irrigation and water distribution systems as main shut off valves. The BEECO Series GV-FXF-OSY is best used in the fully opened or fully closed position, but can be used as a throttling valve as required.

Features:

- UL Listed / FM Approved at 300 P.S.I. (20.8 bar) water working pressure rating.
- Fusion Bonded Interior and Exterior to AWWA C550 Standard.
- Pre-Grooved Stems for Installation of Tamper Switch.
- Complies with MSS SP-70 Standard.

The BEECO® Series GV-FXF-NRS is an AWWA C515 flange x flange resilient seated gate valve with a non-rising stem. Flanges are to ANSI B16.1, Class 125 drilling pattern. The body, bonnet, and wedge (disc) are of high strength ductile iron, ASTM A536, Grade 65-45-12. The wedge is encapsulated with EPDM rubber. The stem and bolts are of stainless steel.

Function: Used in irrigation and water distribution. The BEECO® Series GV-FXF-NRS is best used in the fully opened or fully closed position but can be used as a throttling valve.

Features:

- Available with Handwheel or Operating Nut.
- 300 P.S.I. (20.8 bar) water working pressure rating.
- Fusion Bonded Interior and Exterior to AWWA C550 Standard.

Ratings:

- Stems are heat treated stainless steel, more than twice as strong as brass stems. Highest working pressure rating of any valve in its class 100% of all valves are hydrostatically tested at 2 x full rated working pressure. Proof of design tests include 5x working pressure and 1000 cycle tests. Temperature rated up to 180° F. (82° C)

The BEECO® Series GV-FXF-NRS-MJ is an AWWA C515 Mechanical Joint x Mechanical Joint resilient seated gate valve with a non-rising stem. MJ bells are to AWWA C153 Standard. The body, bonnet, and wedge (disc) are of high strength ductile-iron, ASTM A536, Grade 65-45-12. The wedge is encapsulated with EPDM rubber. The stem and bolts are of stainless steel.

Function: Used in irrigation and water distribution. The BEECO Series GV-FXF-NRS-MJ is best used in the fully opened or fully closed position, but can be used as a throttling valve.

Features:

- 2" Square Operating Nut.
- 300 P.S.I. (20.8 bar) water working pressure rating.
- Fusion Bonded Interior and Exterior to AWWA C550 Standard.

"MIFAB wants to be a leader. To achieve this they continue to innovate and find new products."

- Tom Babcock of Kast Marketing, Chicago, IL

ABBREVIATIONS

BEECO-2019-07

Distributed by: MIFAB®

Beeco Part Numbers. First set of letters Abbreviation for Valve followed by pipe size .75 = 3/4" 6 = 6" Followed by the following major features.

ACV (AUTOMATIC CONTROL VALVES)

- A..... Angle body design
- AL..... Altitude control valve (1 way flow)
- AL-BD..... Altitude control valve (2 way flow)
- BASIC..... Basic valve no pilot
- BC..... Pump control valve
- CV..... Check valve or check feature
- DW..... Deep well pump control valve
- EC..... Electric control (regulating) valve
- EL..... Electric (on/off) valve or feature
- EL..... (On-off) valve or feature
- EL-RFP..... Electric flood protection shut-down valve
- FE..... Excess flow shut-off valve
- FL..... Level control (modulating) valve
- FLDI1..... Level control (on-off) valve or feature
- FLEL..... Level control (electric on-off) valve
- FR..... Flow rate control valve
- HF..... High flow
- HP..... High pressure 300# valve
- HP..... High pressure (ANSI 300)
- PI..... Position indicator
- PR..... Pressure reducing valve or feature
- PR..... Pressure reducing
- PREL..... Pressure reducing / electric (on-off)
- PS..... Pressure sustaining
- PS..... Pressure sustaining
- PSDI..... Differential sustaining valve or feature
- PSEL..... Pressure sustaining / electric (on-off)
- PSR..... Pressure sustaining/relief valve or feature
- Q..... Quick closing feature
- QR..... Quick relief valve or feature
- RE..... Hydraulic surge anticipator valve
- REEL..... Electric surge anticipator valve
- SSV..... High pressure safety shut-down valve
- UL..... Underwriters laboratory approved

PRV (PRESSURE REDUCING VALVES)

- C..... Compact model
- CPVC..... Plastic connections
- DU..... Double unions
- F..... Full model (separate strainer cavity)
- IPS..... Internal pipe system (same as NPT)
- JK..... Jumper kit
- LL..... Low lead (ab 1953 compliant)
- PEX..... Pex connections
- SU..... Single union
- SWT..... Copper sweat fitting
- UK..... Union kit

FRP (FRIENDLY REDUCED PRESSURE BACKFLOW PREVENTERS)

- BA..... Buy america
- DCDA..... Double check detector assembly
- G..... Grooved end connections
- LF..... Less fittings (no ball valves attached)
- LH..... Locking handles on ball valves

- LL..... Low lead (ab 1953 compliant)
- NRS..... Non rising stem gate valve
- OSY..... Outside stem and yoke gate valve
- QT..... Quarter turn ball valves as shutoffs
- RPDA..... Reduced pressure detector assembly
- S..... Strainer attached
- SH..... Stainless handles on ball valves

PRB (PRESSURE VACUUM BREAKERS)

- LL..... Low lead (ab 1953 compliant)
- QT..... Quarter turn ball valves as shutoffs

DC (DOUBLE CHECK (IN LINE))

- FWM..... Female water meter
- LL..... Low lead
- NPT..... National pipe thread
- SWT..... Copper sweat fitting

AG

- AG..... Air Gap

GV (GATE VALVES)

- FM..... Factory mutual approved
- FXF..... Flanged by flanged
- FXG..... Flanged by grooved
- GXG..... Grooved by grooved
- MJ..... Mechanical joint
- NRS..... Non rising stem gate valve
- OSY..... Outside stem and yoke gate valve
- UL..... Underwriters laboratory approved

CV (CHECK VALVES)

- IPS..... Internal pipe system (same as NPT)
- LL..... Low lead (ab1953 compliant)
- RD..... Rubber disc
- SWT..... Copper sweat fitting
- WS..... Weight and spring

ASVB (ANTI-SIPHON VACUUM BREAKERS)

- B..... Brass finish
- CP..... Chrome plated finish
- LL..... Low lead (ab 1953 compliant)

ASVB (ANTI-SIPHON VACUUM BREAKERS)

- B..... Brass finish
- CP..... Chrome plated finish
- LL..... Low lead (ab 1953 compliant)

HVB (HOSE VACUUM BREAKERS)

- CP..... Chrome plated finish
- LL..... Low lead
- RB..... Rough brass finish

DU (DIELECTRIC UNIONS)

- IPS..... Internal pipe system (same as NPT)
- LL..... Low lead
- SWT..... Copper sweat fitting

EPV (ECCENTRIC PLUG VALVES)

- FLG..... Flanged (ANSI 150)
- MJ..... Mechanical joint

STR (STRAINERS)

- BRZ..... Bronze material (C84400)
- FLG..... Flanged
- IPS..... Internal pipe system (same as NPT)
- LL..... Low lead
- PC..... Epoxy coated
- SWT..... Copper sweat fitting

BV (BALL VALVES)

- BRZ..... Bronze material (C84400)
- IPS..... Internal pipe system (same as NPT)
- LH..... Locking handles on ball valves
- LL..... Low lead (ab 1953 compliant)
- SH..... Stainless handles on ball valves
- SWT..... Copper sweat fitting

PG (PRESSURE GAUGES)

- BK..... Back port
- BTM..... Bottom port
- T..... Top port

AV (AIR VENTS)

- FL..... Flanged (ANSI 150)
- HP..... High pressure (ANSI 300)
- K..... Air & vacuum
- KA..... Combination air release and air & vacuum
- MH..... Full port
- MS..... Reduced port
- P..... Plastic
- SA..... Surge arresting feature
- SS..... Stainless steel
- TH..... IPS threaded
- WP..... Wastewater

Distributed by: MIFAB®

TERMS AND CONDITIONS

BEECO-2019-07

WHOLESALE DISCOUNT: Contact BEECO® or your local representative for your applicable discount structure.

FREIGHT ALLOWANCE: Ex Works, BEECO's Chicago, Illinois Factory or Manufacturer Representative's warehouse with full motor freight allowed on shipments of \$2,500 Net or more, within the continental U.S.A. or Canada, except Alaska, Hawaii and Puerto Rico. BEECO® reserves the right to choose the carrier and route of shipment. Alaska: Ex Works, Seattle, WA. Hawaii: Freight allowed on shipments of \$3,500 or more only when shipped from West Coast, U.S. Puerto Rico: Ex Works, Miami, Florida. There is no allowance for United Parcel Service, Federal Express or Shipment by air service. Full motor freight is allowed on shipments of \$3,500 Net or more, within the continental U.S.A. and Canada for any combination of BEECO, Counterline, No Hub Coupling, Trench Drain, Access Door and Trap Seal Primer products. Shipping dates are estimates and time of delivery is not the essence of the sale of the contract. Therefore, under no circumstances will BEECO have any responsibility on account of any delays in manufacture, transportation, or otherwise. Additional freight services such as construction site delivery, lift gate delivery service, re-consigned freight or notification charges, are not included in full freight allowance terms, and will result in additional freight charges.

QUOTATION TERMS: List Price and discount protected for 30 days from date issued by BEECO®. Orders received within this period must be released for shipment within 30 days from date of purchase order, otherwise, prices will be those that are in effect at the time of shipment.

PAYMENT TERMS: Terms of payment are Net 30 days from the date of the invoice. All pricing in United States currency unless sold in Canada in which case Canadian dollars is the currency used. The Buyer shall pay all sales, consumers, and / or any other applicable taxes. Past due accounts will be subject to a 2% per month service charge from the date of the invoice. If any proceedings be instructed by or against Buyer under any bankruptcy or insolvency law, or if Buyer shall fail to make timely payment on this or any other order, or if, in MIFAB's judgment, Buyer's financial situation justifies such action, BEECO® may, at its election, require payment in advance or cancel the order as to any unshipped item and require payment of its reasonable cancellation charges. If Buyer delays completion of manufacture, BEECO® may elect to require payment according to percentage of completion. Equipment held for Buyer shall be at Buyer's risk and expense. In all cases, regardless of partial payment, title to the Products shall remain with BEECO® until payment for the Products (including any notes given therefore) has been made in full. Should legal action be necessary to enforce payment of an unpaid invoice, the Buyer will assume full responsibility for any court costs and reasonable attorney fees. All orders subject to credit check and approval prior to shipment. Confirmed irrevocable letter of credit or cash in advance of shipment is required for accounts without an established line of credit. Minimum invoice amount is \$100. BEECO reserves the right to apply a minimum order charge to equal \$100. BEECO's Accounting Department must be notified of potential pricing errors within 30 days of the invoice date. Any terms and conditions stated on Buyer's orders which are inconsistent with MIFAB's quotation and Terms and Warranties shall be of no effect.

RETURNED GOODS RESTOCKING CHARGE: Standard product may be returned within a one year period only with written permission from BEECO®. All products in catalog are not considered Standard. Standard product to be determined by BEECO®. Returned goods are subject to a 25% restocking charge, plus cost of reconditioning, if necessary, to make material saleable. Material must be returned to BEECO® freight prepaid only after written permission from BEECO® to accept the returned material. Buyer must provide copy of the original invoice on which the material was charged. The original outgoing freight cost to ship the order will be deducted from the credit. Credit allowance will be in the form of merchandise credit only-not cash credit which must be used within 12 months of the date of issue. The value of a return must total \$100 to qualify for credit allowance. Products designated non stock and / or that have been specially made (require a sign off drawing by BEECO®) are not subject to return or cancellation.

LIMITED WARRANTY: BEECO® warrants each product against defects in material and workmanship for a period of one year from the date of original shipment. In the event of such defects within the warranty period, BEECO® will, at its option, replace or recondition the product without charge. This shall constitute the exclusive remedy for breach of warranty, and BEECO® shall not be responsible for any incidental or consequential damages, including, without limitation, damages or other costs resulting from labor charges, delays, vandalism, negligence, fouling caused by foreign material, damage from adverse water conditions, chemicals, or any other circumstances over which BEECO® has no control. This warranty shall be invalidated by any abuse, misuse, misapplication or improper installation of the product. For inoperative products beyond the warranty period, we assume no liability for replacement of valves due to service conditions beyond our control. Consult local codes and specifications and have a qualified licensed professional install all BEECO® devices.

BEECO® MAKES NO OTHER WARRANTIES EXPRESSED OR IMPLIED AS PROVIDED IN THIS LIMITED WARRANTY.

ILLUSTRATIONS OR TYPICAL INSTALLATIONS: The typical installations for various products in each product section are intended to illustrate the products and their options. Under no circumstances are they to be construed as recommended installation procedures. Consult local codes and project specifications for proper installation instructions.

ALL SALES SUBJECT TO BEECO's TERMS AND WARRANTIES.

NOTE: Prices and terms are subject to change without notice and supersede all previous quotations. The right is reserved to change or modify product design or construction without prior notice and without incurring any obligation to make similar changes and modifications to product previously or subsequently sold. Contact BEECO® for any clarification.
