**Function:** The CRM-B Series is designed for superior support of gas and refrigeration pipes at a higher elevation from the roof surface. The roller allows for longitudinal movements of the pipe. The CRM provides a less expensive alternative to the larger roller series products. It is suitable for most types of roofing material or other flat surfaces, and is ideal for smaller pipes. The roller bracket has mounting holes 1" apart so that the roller can be adjusted from 6 1/4" or 7 1/4" from the centerline to the ground.
