MI-DIAL-2-LD

STAINLESS STEEL SUPPLY & WASTE DIALYSIS BOX WITH TWO VALVES (NO DOOR)

SPECIFICATION: MIFAB® MI-DIAL-2-LD supply and waste dialysis box is constructed of 16 gauge, Type 316 stainless steel (satin finish), continuous welded corners, four mounting anchor tabs, two 1/2" NPT PVC supply connections with PVC ball valves and 3/4" hose connections. Bracket with grommets for two 3/8" diameter hose and 2" stainless steel drain connection with sloped bottom.

FUNCTION: MIFAB's Stainless Steel supply and waste dialysis boxes are designed for use with dialysis machines that use RO (reverse osmosis) and DI (deionized) water, mixed with dialysate saline concentrate. This water corrodes steel, some stainless steels, cast iron, copper and brass metals regularly used in supply and waste systems. There are two types of dialysis machines. One type mixes dialysate into the RO-DI water inside the machine and the other requires pre-mixed water. When the first type is used, MIFAB's single valve models (MI-DIAL) are satisfactory. When the second type is used, MIFAB's two valve models (MI-DIAL-2) are required.
