

MIFAB MI-HUB NO HUB COUPLINGS FEATURES AND BENEFITS**1) Stainless Steel Shield**

A corrugated stainless steel shield provides a solid surface for the bands to tighten against to ensure a uniform grip around the pipe / fittings.

**2) Mechanical Interlocking Clamp Design**

A one piece stainless steel screw housing mechanically interlocks the housing to the stainless steel band. This one piece housing eliminates leak paths than can develop with welded or staked clamps.

**3) Floating Eyelet Design**

The stainless steel clamp bands can move independently from the corrugated stainless steel shield. This independence prevents the shield from crimping during tightening which can lead to leaks.

**4) 5/16" Hex Head Screw**

The stainless steel 5/16" hex head screw is engineered to accept 60-inch pounds of installation torque to ensure a secure band / shield assembly around the pipe / fittings.

**5) Formed Gasket Design**

The gasket is designed to form fit around the pipe and the inside of the shield so that when the clamping forces are applied, a superior sealing pressure and holding power is achieved. MIFAB's gaskets are made from a virgin elastomeric compound that meets the requirements of ASTM C564.

**6) Approvals**

MIFAB's MI-HUB Series of no hub couplings are tested and certified to the following Standards:

ASTM C-564, ASTM C1277-2009a, CISPI 310-2010, CSA B602-2010 and CAN/ULC S102.2-07 "Smoke Test."

They are also listed with I.A.P.M.O.

CALIFORNIA PROPOSITION 65 WARNING. This product contains chemicals known to the State of California to cause cancer and birth defects or other reproductive harm.

Design and dimensions are subject to modification. Prices do not include applicable taxes. Visit www.mifab.com for the most recent product information.
