PROMENADE DECK DRAIN

Specification: MIFAB® Series R1100-PR lacquered cast iron roof drain with anchor flange, cast iron waterproofing membrane clamp ring, and standard 1" (25) thick, 8" (203) square adjustable ductile iron tractor grate with 3/8" (9) maximum width drainage slots and a free area of 26 square inches.

Function: Used in any type of flat roofs and gutters designed for promenade or recreational areas. Square top blends in with tile and brick patterns and has enough free area for efficient drainage of rainwater. Narrow, 3/8" (9) drainage slots prevent debris from entering the drain line. 8" diameter body is ideal for applications with limited space. Anchor flange and membrane clamp with tongue in groove design provides for secure grip of membrane and roof flashing materials.

Note: When used as a floor or area drain in exterior areas and subject to rainfall, ensure that the free area is equal to twice the transverse (cross sectional) area of the connecting pipe.
