ROOF DECK CONDENSATE RECEPTOR DRAIN

Specification: MIFAB® Series R1100-RS lacquered cast iron roof deck condensate receptor drain with anchor flange, cast iron waterproofing membrane clamp ring with integral gravel stop, overflow and cast iron dome strainer.

Function: Used in flat roofs and gutters to receive condensate and wastewater from air conditioners, cooling towers and other mechanical equipment. The 2" high external dam prevents storm water from entering the drain line and the dome strainer prevents debris from entering the drain line. The 8" diameter body is ideal for applications with limited space. Anchor flange and membrane clamp with tongue in groove design provides for secure grip of membrane and roof flashing materials.
