

Load Class E. Extra heavy duty load rated grates for high-speed traffic of 60 ton gross vehicle weight, 10 ton wheel load including solid tire and hard wheeled forklift traffic. Good resistance to impact from struts or metal wheels. All grates 20" long.

- T1400-PG-4 ductile iron slotted grate.

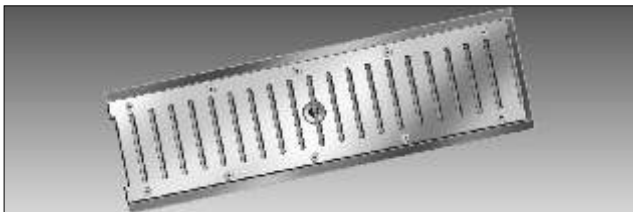

Note: Must use ductile iron frames with grates for class E + C load rating applications.

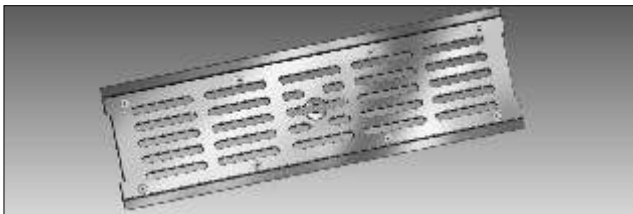

- T1400-PG-LG-4 ductile iron longitudinal slotted grate. Horizontal slots for increased intake ability.

- T1400-PG-4-13 galvanized ductile iron slotted grate for corrosion resistance.

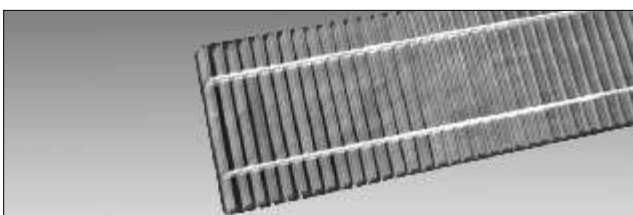

- T1400-PGV-4-3 ductile iron slotted grate with Type 304 stainless steel veneer. Illustrated with cast iron frame and Type 304 stainless steel veneer assembly. Must order assembled as illustrated.

- T1400-PGV-LG-4-3 ductile iron longitudinal slotted grate with Type 304 stainless steel veneer. Horizontal slots for increased intake ability. Illustrated with cast iron frame and Type 304 stainless steel veneer assembly. Must order assembled as illustrated.

- T1400-PG-HPP polypropylene heel proof grate for chemical resistance. (Available in various colors. Contact MIFAB for selection and minimum order requirement.)

- T1400-PG-SBG fabricated stainless steel (Type 304) bar grate.
