

Specification: MIFAB Series A2-BP lacquered 18 gauge galvanized steel sump receiver with a recess to receive the flange of the roof drain body and hardware to bolt the roof drain body to the underside of the sump receiver.

Function: Used in any type of flat roofs. The underdeck clamp ring is eliminated with this product because the roof drain body is bolted to the underside of the sump receiver with the securing brackets and hardware provided. Slots around the perimeter of the sump receiver permit the installer to secure the system to the top of the deck.

15 1/2" (394) Dia.

24.0" (610) Sq.

HS-20 HARDWARE KIT PROVIDED

SLOTS TO SECURE BEARING PAN TO ROOF DECK (1-1/2" x 1/4")

Note: Depth of recess = 9/16" (14).

Top view with roof drain body installed

Bottom view with roof drain body installed with three clamps

Note: 8" IC, 10" and 12" NH outlets require the A7-BP.

OPTIONAL VARIATIONS:
 Cutout for 90 degree bodies

SUFFIX
 -90
