

H-20 LOAD RATED LID TEST REPORT:

The test report below shows that the MIFAB lids were tested to 44,962lbs (200KN). Any lids that are tested above 16,000lbs are H-20 load rated. MIFAB's lids exceeded the H-20 load requirements.

Test Report

— Test Standard: EN124:1994

1. Test information:

Test Item:	Load capacity	Operator:	N/M
Number of Specimen:	1	Test Date:	2018/6/6
Test No.:	C200-1	Test Time:	13:29

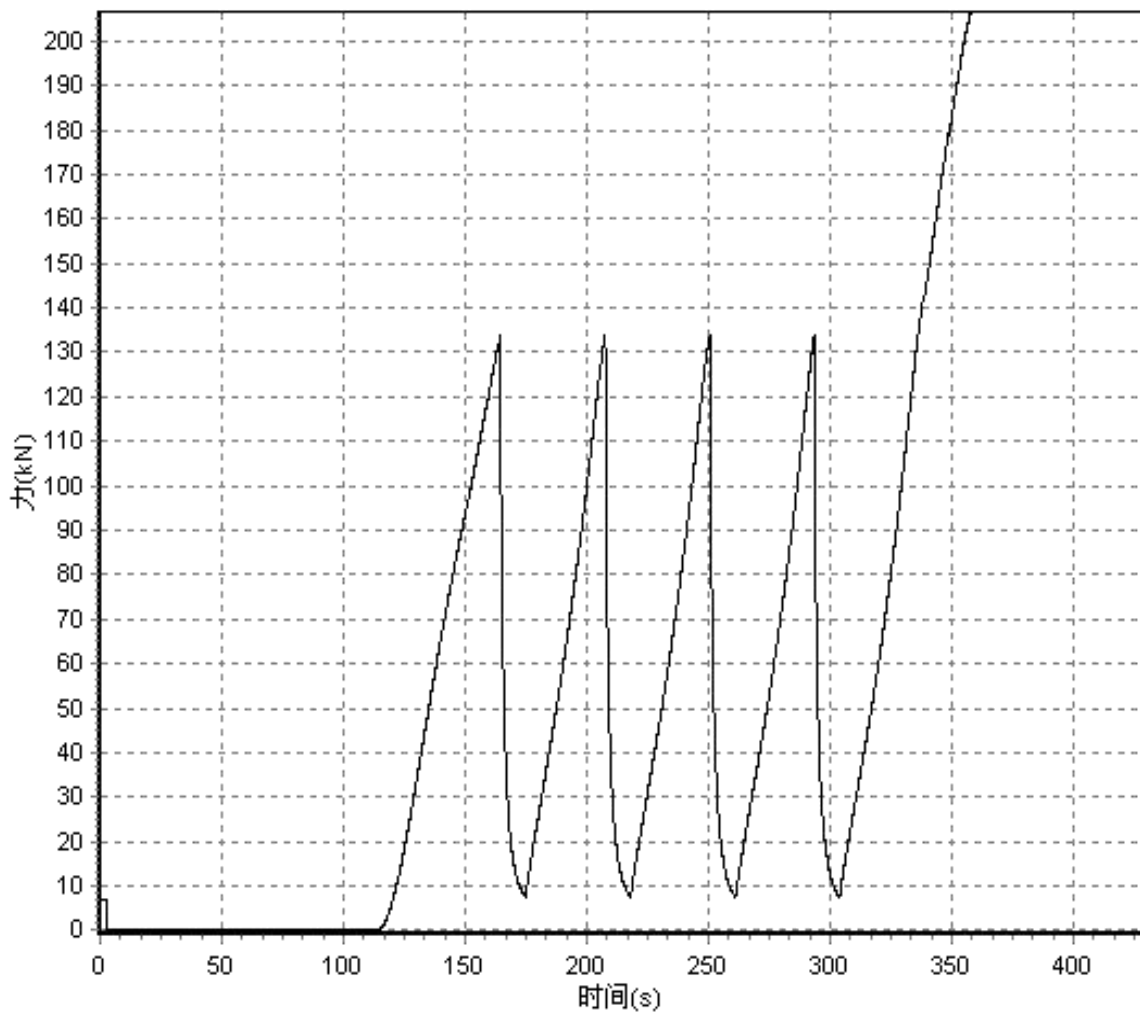

2. Specimen information:

Test Load:	200KN	Specimen Shape:	Round
Specimen Size (mm):	Φ654	Specimen Area (mm ²) :	335927
Load Block Size (mm):	Φ300	Load Block Area (mm ²) :	70686

3. Measurement of load capacity:

The load up to 2/3 (133KN) of the test load on the specimen through a test block, then released the load. This procedure shall be carried out four times. And then the fifth loading shall be load up to the test load (200KN) on the specimen. The specimen shall not show cracks in the course of the whole test.

4. Result information:

5. Verdict:

Load peak: 206KN / No cracks / Pass
