HORIZONTAL ADJUSTABLE WATER CLOSET CARRIER WITH AUX.2" INLET (FOR SIPHON JET & BLOWOUT TOILETS)

Specification: MIFAB® Series MC-10-27 (Specify L for left or R for right design) single, horizontal, adjustable, water closet carrier with lacquered cast iron fitting, 4" (102) no hub waste, 2" (51) no hub vent connection, 2" (51) no hub auxiliary inlet connection, lacquered cast iron gasketed adjustable faceplate, universal floor mounted cast iron foot supports, adjustable 8" tapered thread ABS nipple with integral test cap, neoprene bowl gasket, hardware, threaded rod protectors, polished chrome plated finishing cap nuts and rear anchor tie down support.

Function: Used with off the floor plumbing fixtures that are wall mounted and have no contact with the finished floor. The auxiliary inlet is designed to receive waste from urinals and lavatories beside or opposite the closet carrier in order to reduce the amount of space required in the pipe chase. The closet carrier is completely concealed within the wall and supports the load of the fixture through a faceplate and foot support system that is anchored to the floor. Sanitation underneath the fixture is more efficiently and economically maintained when installed off of the floor compared to floor mounted.

Note: 10 1/2" (267) minimum space required between front of foot and rear of anchor support. 8" (203) minimum in wall space required between back of rear anchor support and back of in wall foot supports.

Note: Foot supports and faceplate are assembled at the factory before shipment in the typical siphon jet water closet configuration and are reversible for the blowout water closet design.
