MC-54-ADJ

**WALL MOUNTED LAVATORY
SUPPORT WITH CONCEALED ARMS**

Specification: MIFAB® Series MC-54-ADJ wall mounted concealed arm lavatory carrier with lacquered, adjustable, ductile iron concealed support arms. Complete with fabricated, horizontal adjustable steel wall plate, welded steel nipples with set screws, and fixture leveling and locking hardware.

Function: Used to secure the fixture to the wall in areas where a floor mounted carrier cannot be installed. Steel wall plate to be mounted to wall structure per site requirements (example: bolted, welded, anchored, etc). The wall structure must be strong enough to bear the weight of the fixture. The vertical load bearing components are concealed within the wall and the fixture carrier has no contact with the finished floor inside of the room. The horizontal adjustment of the steel wall plate is ideal to install with a wide range of lavatories.

Non-Slip locking device tightens down on the inside of the fixture after leveling operation is completed

See chart for "L" dimension

Ductile iron concealed support arms. Provide adequate support for any lavatory specified, and are completely pre-assembled with leveling screws and locking devices at factory.
