

MIFAB MI-HUB / MI-QHUB NO HUB COUPLINGS FEATURES AND BENEFITS

1) STAINLESS STEEL SHIELD

A corrugated stainless steel shield provides a solid surface for the bands to tighten against to ensure a uniform grip around the pipe / fittings.

2) MECHANICAL INTERLOCKING CLAMP DESIGN

A one piece stainless steel screw housing mechanically interlocks the housing to the stainless steel band. This one piece housing eliminates leak paths that can develop with welded or staked clamps.

3) FLOATING EYELET DESIGN

The stainless steel clamp bands can move independently from the corrugated stainless steel shield. This independence prevents the shield from crimping during tightening which can lead to leaks.

"We brought Mifab couplings into our inventory and have been very happy with them. Great Price Point, and readily available."

— John Kozel, WinSupply, Ontario, CA

4) 5/16" HEX HEAD SCREW

The stainless steel 5/16" hex head screw is engineered to accept minimum 60 inch pounds of installation torque to ensure a secure band / shield assembly around the pipe / fittings.

5) FORMED GASKET DESIGN

The gasket is designed to form fit around the pipe and the inside of the shield so that when the clamping forces are applied, a superior sealing pressure and holding power is achieved. MIFAB's gaskets are made from neoprene which meets the requirements of ASTM C564.

6) APPROVALS

MIFAB's MI-HUB / MI-QHUB Series of no hub couplings are tested and certified to the following Standards:

ASTM C-564, ASTM #C1277-2018, CISPI 310-2010, CSA B602-2010 and B70 and CAN/ULC S102.2-07 "Smoke Test."

They are also listed with I.A.P.M.O.

They are NSF Certified to the CISPI 310 Standard.

CALIFORNIA PROPOSITION 65 WARNING. This product contains chemicals known to the State of California to cause cancer and birth defects or other reproductive harm.
