**R1280**

**COMBINED LARGE SUMP ROOF DRAIN WITH A8 BODIES AND SECONDARY OVERFLOW**

**Specification:** MIFAB® Series R1280 combined large sump roof drain and secondary overflow system; consisting of 24" x 48" galvanized sump receiver, two lacquered cast iron A8 four bolt pattern roof drain bodies with 15" diameter anchor flange, cast iron waterproofing membrane clamp rings with integral gravel stop, one 4" ABS overflow standpipe and two self-locking polyethylene dome strainers with a combined free area of 250 square inches.

**Function:** Used in any type of conventional or flat roofs where a safety overflow, which receives water only when the accumulation is greater than the height of the standpipe, is required to be located beside a standard roof drain. The standpipe can be adjusted to attain the desired overflow water depth. Large free area domes provide for efficient drainage of rain water and prevents debris from entering the drain line. The underdeck clamp ring is eliminated with this product because the roof drain bodies are bolted to the underside of the sump receiver and is therefore fixed. Four pieces of 3/8" hardware bolts and washers are provided to secure MIFAB's A8 bodies to the underside of the R1280-BP.

PIPE SIZE	NO HUB (STANDARD)	INSIDE CAULK (X)
3" (76)	4 1/8" (105)	4 1/8" (105)
4" (102)	4 1/8" (105)	4 1/8" (105)
6" (152)	4 1/8" (105)	4 1/8" (105)

SUFFIX	OPTIONAL VARIATIONS
-6	Vandal proof domes
-11	Acid resistant epoxy coating
-12	Galvanized metal domes
-12A	Galvanized bodies and membrane clamps
-13	Galvanized bodies, membrane clamps and domes
-83	Stainless steel mesh screen over domes
(Standard)	No hub outlets
-BA	Minimum 51% material cost made in the USA
-E	Adjustable extension
-G	Stainless steel ballast guards
-PA	Pennsylvania Steel Act compliant product
-RG	RoofGuard non clogging cast iron domes
-V	Fixed static extension, 2", 3", 4"
X	Inside caulk outlets (2", 3", 4")
